

Ardelyx (ARDX): Commercial Gastro Cash Ramp

Ardelyx trades at **\$3.83 (\$988.9M Market Cap)**, down -54.4% from \$8.40 highs. ARDX generates **\$450.9M in revenue** with IBSRELA generating profitable prescription growth.

The market sold off ARDX over Medicare Part D reimbursement friction for Xphozah. However, IBSRELA's commercial IBS-C sales alone provide a solid fundamental floor while management restructures renal distribution.
