PITCH — CARD.L (CARD FACTORY PLC) — VERDICT

PROPOSED — STARTER (1.5% / \$1.0M BASE) — UK's leading specialist retailer of greeting cards and celebration essentials with ~1,050 stores and vertical manufacturing in Yorkshire.

What we believe

1. **Extreme Value Leadership & Vertical Moat:** Card Factory designs and prints its cards in-house at its manufacturing plant in Yorkshire, achieving an average card selling price of **~£1.50 (vs ~£3.50+ for Moonpig, Clintons, and supermarkets)**. In a cost-of-living squeeze, it takes continuous volume market share.
 2. **Double-Digit FCF Yield (8-9x FCF):** Generates **~£30M–£35M in annual Free Cash Flow (>12% FCF Yield)** on a £254M market cap, with **zero net bank debt** (~£20M ex-leases).
 3. **Asset-Light Wholesale Expansion:** Rolling out partnerships with Aldi, The Reject Shop (Australia), and Middle East retailers to monetize manufacturing scale without store lease liabilities.
-

What the market believes

1. **UK Retail & Postage Headwinds:** Fears over high street footfall declines and Royal Mail stamp price inflation reducing card sending volumes.
 2. **Wage Inflation:** UK National Living Wage increases pressure store-level operating margins.
-

Why we might have edge

- **Cockroach Unit Economics:** Vertical integration allows CARD to absorb cost inflation that bankrupts competitors while returning double-digit cash yields to shareholders.

ARMED SENSORS

- **Earnings Sensor:** CARD.L-INTERIMS | 2026-09-29 (H1 Results — bar: wholesale revenue growth $\geq 15\%$).
- **Wage Cost Monitor:** UK Autumn Statement National Living Wage updates.

What remains unverified

1. Exact volume elasticity of physical card sending to future Royal Mail stamp price hikes.
