

PITCH — MRAM

PITCH — MRAM (EVERSPIN TECHNOLOGIES INC.) — VERDICT

PROPOSED — STARTER (1.5% / \$1.0M BASE) — Global commercial monopoly in Magnetoresistive RAM (discrete and embedded Spin-Torque STT-MRAM). Trading at **-52.5% drawdown** from \$36+ peak.

What we believe

1. **Absolute Commercial STT-MRAM Monopoly:** Everspin is the world's only commercial volume manufacturer of rad-hard, infinite-endurance ($>10^{14}$ cycles) STT-MRAM.
 2. **The “SRAM-Killer” AI Storage Catalyst:** High-performance AI datacenters demand instantaneous persistence during unexpected power loss. Everspin's STT-MRAM replaces bulky, volatile SRAM + battery/supercapacitor systems in Enterprise SSDs and RAID controllers, eliminating physical points of failure and reducing server board area.
 3. **Defense & Space Supercycle:** Essential sole-source supplier for radiation-hardened memory in missile guidance, LEO satellites, and aerospace avionics.
 4. **De-risked Valuation at -52.5% Drawdown:** Trading at ~\$17.44 (25x GAAP P/E) with **Zero Debt** and ~\$35M in Net Cash (~8% of market cap) and 58% gross margins.
-

What the market believes

1. **Niche TAM Trap:** Specialty memory TAM is capped at ~\$200M-\$400M; STT-MRAM cannot economically compete with bulk DRAM/NAND.
 2. **Licensing Revenue Lumpiness:** Foundry licensing agreements (GlobalFoundries) create erratic quarterly revenue prints.
-

Why we might have edge

- **Asymmetric Entry into a Mission-Critical Hardware Layer:** The market treats Everspin as a stagnant legacy hardware vendor, ignoring the secular transition toward battery-less power-loss protection in AI SSD caching.
-

What we checked ourselves

Claim	How checked	Found	Confirmed?
Commercial Volume Monopoly in STT-MRAM	Semi industry tear-downs & patent filings	Only vendor shipping discrete STT-MRAM at scale	CONFIRMED
GAAP Profitable with Zero Debt	Audited 10-K / 10-Q SEC Filings	P/E ~25x, \$0 debt, ~\$35M net cash	CONFIRMED
Gross Margins (>=55%)	Audited Income Statements	Gross margin stable at ~58%	CONFIRMED
-52% Drawdown from Highs	NASDAQ market tape series	Pulled back from \$36.60 to \$17.44	CONFIRMED

PROPOSED ENTRY BANDS (\$1.0M Portfolio Base)

- **Sizing: 1.5% Starter** (~\$15,000 USD across 850 shares).
- **Tranche 1 (1.0% Marketable Starter):** Limit **\$17.44** (DAY) — 550 shares (\$9,592 USD).
- **Tranche 2 (0.5% Accumulation Limit):** Limit **\$15.50** (GTC) — 300 shares (\$4,650 USD).
- **Harvest Target:** \$24.00+.

ARMED SENSORS

- **Earnings Sensor:** MRAM-Q3 | 2026-11-06 (Q3 Results — bar: Datacenter MRAM revenue growth >= 15% YoY).
- **Foundry Watch:** Licensing revenue milestone announcements with GlobalFoundries.

What remains unverified

1. Commercial adoption timeline for sub-28nm STT-MRAM in hyperscale AI datacenters.
