

Prosus N.V. (PRX.AS): The 35% Tencent NAV Arbitrage

Prosus trades at **€38.01 (Market Cap €79.66B)**, offering a massive **~35% holding company discount to Net Asset Value**. Its **~24.5% equity stake in Tencent** alone is worth **over €95 Billion**, before counting **€15B+** in global e-commerce and fintech assets (iFood, PayU, OLX).

Management executes a mathematical compounding flywheel: trimming small amounts of Tencent stock to fund an **open-ended daily share repurchase program in Prosus shares**, accreting per-share NAV every single day the discount persists.
