

Anti-Book Triage — turnaround watch vs true-avoid

2026-06-28. 46 rejected names triaged: 21 catalyst-gated WATCH-turnarounds, 25 true-avoids. Default was AVOID — watches earned it. Generator-classified; the WATCH names get the full two-stage as their catalyst nears.

21 WATCH-TURNAROUND (now on the Desk catalyst watch)

Ticker	Catalyst date	Catalyst	Flip-to-BUY trigger
CPRI	2026-08-15	Q1 FY2027 earnings — first test of management's FY2027 guidance (return to low-single-digi	Michael Kors prints a flat-to-positive constant-currency comp (currently -8.4%) — i.e., the guided FY2027 revenue inflec

25 TRUE-AVOID (broken / no catalyst / value-trap)

- **MONC.MI** — Not a turnaround at all, so it fails the WATCH bar on the first prong (bombed-out valuation). Moncler is the healthiest large-cap in luxury: Q1 2026 revenue +12
- **RI.PA** — Falsified-catalyst value trap. The bull thesis rested on the China brandy anti-dumping resolution + destocking ending; that catalyst already fired (final ruling
- **RCL** — Not a turnaround setup — it's the inverse. RCL trades \$322.65 near 52-wk highs (\$232-\$362 range), up ~6-7x off 2022 lows; YTD +16.3%. Primary data shows record,

- **CCL** — Not a Kering-style turnaround — the turnaround already happened and is fully reflected. Fresh FY26 Q2 (ended 2026-05-31, reported 6/23/26): RECORD revenue \$6.66
- **BIRK** — Not a turnaround — nothing is impaired to turn. Fresh Q2 FY26 (3/31/26): revenue €618M, +14% constant currency, broad-based across all regions, 111 own stores;
- **NCLH** — Not a Kering-style turnaround: the business already recovered and is profitable/growing (net income Q1'26 +\$105M vs -\$40M yr-ago; Q3'25 +\$419M), and the stock a
- **CVNA** — Wrong archetype, not a turnaround. Fresh SEC XBRL (latest = Q1 FY2026 10-Q): rev FY24 \$13.7B -> FY25 \$20.3B (+49%), Q1'26 \$6.4B (+52% YoY); GAAP net income FY25
- **DDS** — Not a turnaround at all — the opposite. Dillard's is highly profitable and well-capitalized on fresh primary data: FY2025 (ended 2026-01-31) net income \$570M on
- **KMX** — Not a Kering setup — the bombed-out entry is already gone and earnings are still declining. Live \$52.90, +36.9% YTD, ~75% above the 52w low (\$30.26), trading ~3
- **PSMT** — Not a turnaround setup — nothing is broken and the valuation is not bombed-out. Fresh Q2 FY2026 10-Q (ended 2026-02-28): revenue +9.7% YoY, comps +7.6%, members
- **WRBY** — Not a turnaround setup — the valuation leg of a Kering-style thesis fails. Live \$27.50, near the 52-week high (\$30.97) and +26.2% YTD; the stock has already re-
- **CRI** — Not a Kering setup — only the survivable-balance-sheet leg is present; the bombed-out valuation leg is gone. Live \$43.09, +33.8% YTD, sitting at the 52-wk high
- **JACK** — Bombed-out (~\$12.82 vs \$25 52w high, div cut to zero) but the turnaround leg is absent. Q2 FY2026 same-store sales -3.8% and DECELERATING with FY guidance for c
- **NBR** — No longer a bombed-out setup: live \$84.13, up 55% YTD and ~3x off the \$27.47 52w low, only ~25% below the 52w high — the re-rate already happened, so the Kering
- **ADMA** — Value-trap with a data-corroborated honesty flag, not a turnaround. Cheap (~\$8.30, -53% YTD after the Mar-24-2026 Culper channel-stuffing report + guidance with
- **BBY** — Recovery already executed and priced — fails the bombed-out and dated-catalyst legs of a Kering setup; passes only the balance-sheet leg. Live \$76.89 (IBKR), +1
- **EQT** — Not a turnaround — the bombed-out/impaired premise is refuted by EQT's own audited data. SEC XBRL (CIK 0000033213): revenue \$5.27B (FY24)->\$8.64B (FY25); net in
- **GPOR** — Gulfport is a financially healthy, deleveraged post-Ch11 Appalachian/Utica natural-gas E&P, not a broken business: FY2025 OCF \$803M on ~\$528M capex (~\$275M FCF)
- **UAN** — Not a turnaround setup. UAN is a variable-distribution nitrogen-fertilizer MLP that is NOT bombed out: live \$109.55, +7.25% YTD, only ~21% off the 52-wk high (\$
- **BKE** — Not a turnaround in either direction. Live \$226 vs 52-wk high \$230 (+22.5% 1yr) — not bombed out, so no Kering-style setup. Business is healthy, not broken: Q1
- **NUTX** — Not a turnaround — it is the opposite of a Kering setup. NUTX already ran ~15x and trades at \$149 near its 52-wk high of \$193 (~\$1.0B mkt cap), so the required
- **RIGL** — Not a turnaround setup — the turnaround is already complete and priced, so the WATCH bucket's required "bombed-out valuation" prong fails. Live \$36.99, up ~100%
- **NRDS** — Bombed out (-37% YTD, on 52-wk low) and balance-sheet-fine (GAAP profitable: FY25 NI +\$48.7M, Q1'26 +\$20.4M, NGOI 15% margin, \$56M cash) — but the decline is SE

- **SGU** — Star Group LP is a Northeast US home heating-oil/propane distribution MLP in structural secular volume decline (natural-gas conversion, efficiency, warming wint
- **WEYS** — Not a turnaround setup — fails the Kering test on two of three legs. (1) Not bombed out: stock \$38.23, +26% YTD, sitting AT its 52-week high (live IBKR), ~15x P
