

BOND-DESK EXECUTION PACKET · CONFIDENTIAL · 2026-06-18

CA Municipal Sleeve — Call Script & RFQ List

Diversified book (worst single-event quake zone 18%, fire 0). All BUY, hold-to-maturity. Limits = last customer-buy + tolerance.

Buy today: 1 — 861419ZJ1 Stockton USD (test fill)

RFQ as resting orders: \$960,000 / 23 names

Book TEY 8.36%

How to read it. Limit=max price; walk if offered through it. ‡=de-minimis (hard tax ceiling). **TEST**=today's calibration buy. **Fire**=% district value in high-wildfire tracts; **EQ**=seismic Ss; **Zone**=fault zone (spread to keep single-event ≤18%).

The Plan

- 1. **Frame:** self-directed, hold-to-maturity ladder, own credit/pricing, working to limits.
- 2. **The ONE buy today — 861419ZJ1 (Stockton USD)**, most liquid + fully diligenced. If at/inside **99.62**, take \$40,000 — the calibration fill (proves desk + reveals markup vs last 98.658).
- 3. **Submit the rest as resting limit orders** (GTC) at the sheet limits. Don't lift offers.
- 4. **Phase-2 as standing want-list** — the capability test (can they hold GTC bid-wanted?).
- 5. **Qualify** (markup convention, inter-dealer level, BWIC); **close** (fills, settlement, setup).

The Script

THE ONE BUY
"861419ZJ1 printed 98.658 — show me your offer on \$40,000. At or inside 99.62, I'll take it." (read the markup)

SUBMIT THE REST
"Leave the rest as working orders at my limits, GTC — fill me as they come; I'm not lifting offers."

ANCHOR EACH
"Last customer buy on [CUSIP] was [level] — rest me a \$40k bid at [limit]."

QUALIFY
"How do you mark up odd-lot munis? Will you show the inter-dealer level? Can you hold a GTC want-list / run BWICs?"

Decision rules. Take at/inside the limit; walk if through it — no exceptions on ‡ names. Don't show the full book up front. Never market-order an odd-lot. Every name is fire/EQ/Al/credit-underwritten; the Zone column keeps the book diversified as you fill.

Phase 1 · RFQ (liquid)

BUY 861419ZJ1 today; submit the rest as resting limit orders

Post-Call Scorecard

Fill in on the call; send me #1-#8 to score the execution grid.

1. **Which desk** (name + type)

2. **Calibration markup** on 861419ZJ1 (last 98.658): offer _____ – 98.658 = _____ pt → _____ bps/yr (÷15y: 0.25→1.7 · 0.5→3.3 · 1.0→6.7 · 2.0→13) 3. **Markup convention** ☐ disclosed bps ☐ built into price

4. **Inter-dealer level** shown? ☐ yes ☐ no 5. **Standing want-list + BWIC?** ☐ yes ☐ no

6. **A real fill** on a thin name — which / level

7. **Fill-vs-limit reporting** + how confirmed

8. **Custody fee + account setup**

THE GATE — route here only if both ☐ client-directed deep-discount odd-lots and ☐ demonstrated sourcing on a thin name. **Net after-tax TEY** ≈ 8.36% – all-in drag = _____%.

Internal pre-trade prep, not investment/tax advice, not an offering. Levels are indicative EMMA prints and move intraday; confirm live. Every holding is underwritten for fire/earthquake/AI insulation + AB-1200 fiscal cert; the book is diversified to ≤18% worst-single-event fault-zone exposure.
